

TOOL RENTAL

The Hi-Force philosophy of offering a complete service package to support our valued customers needs and requirements includes tool rental services. With an extensive array of products available within the Hi-Force range, it is sometimes difficult for our customers to decide on the most suitable tool in which to invest their money.

Additionally, with our higher value products like high tonnage cylinders, powered pumps, hydraulic torque wrenches, stud bolt tensioners and hydrotest pumps, many clients simply cannot justify the high capital outlay to purchase, especially in cases where their needs for the product are relatively short term or even simply for a one off job. In some cases annual budget restraints also make it difficult to get purchase expenditure approval even though there is a definite requirement for the tools.

Hi-Force actively encourages and promotes its tool rental services package, both at Regional Offices and at participating distributors worldwide. Many of our customers worldwide who have purchased Hi-Force products, initially took the opportunity to "try out" both our product quality and our level of service support via tool rental. Once satisfied, these same customers became brand loyal purchasers of Hi-Force products on a regular basis.

An additional benefit of maintaining a comprehensive fleet of rental tools at our Regional Offices and participating distributors is that users can easily request on-site demonstrations, using rental tools at short notice, or even utilise our rental services whilst having their own equipment serviced or repaired.

In most industries the biggest drain on company profits is the loss of time and productivity, due to delays in the availability of tools, for completing shutdown and maintenance activities. Additionally in new construction projects delay penalties during construction and commissioning can easily be avoided if the right tools are available to carry out the work correctly from the outset. Hi-Force tool rental offers the perfect solution to help avoid unnecessary and costly delays in completion of the work.

Hi-Force tool rental is available on both a short and long term basis and all equipment provided is tested, calibrated and certified prior to mobilisation to site. Tools can be mobilised very quickly from the extensive stocks, held locally, at all Hi-Force group company locations and select Hi-Force Distributors worldwide.

Hi-Force tool rental offers users a fast and economical alternative to purchasing capital intensive specialised equipment, at short notice.
